Student and Financial Aid Charges 2003-2004

American Association of State Colleges and Universities
National Association of State Universities and Land-Grant Colleges

Overview

As the 2003–2004 academic year began, the financial woes of public colleges took the spotlight on Capitol Hill and in statehouses. Record spending cuts designed to balance state budgets resulted in program cutbacks, unfilled faculty positions, staff layoffs, wage freezes and salary cuts at state colleges and universities. Institutions worked to close gaps opened by further reductions in state appropriations. Institutions were forced to cover remaining gaps through significant tuition and fee increases.

The resulting increases, the highest in more than a decade, sparked a renewed public focus on institutional finance, accountability and affordability. Students, parents and members of Congress leveled charges of waste and inefficiency. Governors and legislatures in a number of states considered tuition caps, freezing tuition and exerting greater control over tuition-setting authority. In the face of growing criticism, colleges and universities find themselves under increasing pressure to better explain how they are funded and how those funds are spent.

In the year ahead, costs and prices at public colleges and universities will remain under scrutiny, and continued budget crunches at the state level will place further stress on institutions. The reauthorization

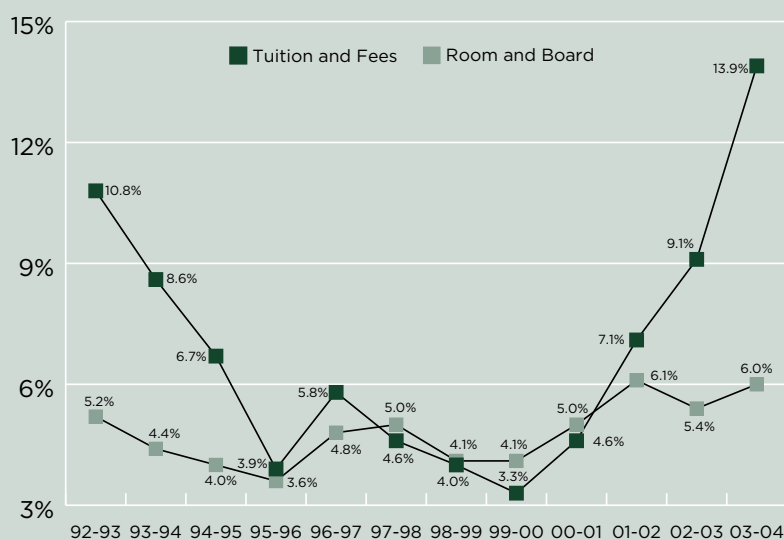

of the Higher Education Act (HEA) will continue, with House and Senate lawmakers in both parties focusing on affordability, accountability and access. Colleges and universities will also have to address increasingly critical students and parents faced with the specter of further tuition and fee increases. These issues will continue to resonate in the years to come, and addressing them will not be easy. Given the challenges of the immediate future, it is a task that campus leaders and policymakers must be prepared to face.

Highlights

Tuition and Fees

Resident undergraduate tuition and fees at public four-year institutions rose 13.9 percent (\$572) for 2003–2004, the largest single-year increase in more than a decade.¹ [Figure 1]

Figure 1. Percentage Increases in Student Charges, Public Four-Year Institutions, 1992–1993 to 2003–2004

Source: The College Board, *Trends in College Pricing 2003*.

2003–2004 student charges and financial aid

Fueling this increase were more than 30 states that averaged tuition and fee increases above 10 percent for the 2003-2004 academic year.²

The majority of public four-year institutions (58.1 percent) charged less than \$4,500 in resident undergraduate tuition and fees; 41.7 percent charged less than \$4,000 in tuition and fees.

Room and Board

Room and board charges increased 6 percent from 2002-2003 to 2003-2004. This increase was less than one percentage point higher than the rate of increase for the previous one-year period (5.4 percent).³

Trends and Indicators

Over the past few years, the cost of attending college as a percentage of family income has stabilized for those in high-income brackets. In the last two years, the

percentage of family income required has edged up slightly for middle-income families (requiring approximately 19 percent of annual income) and sharply for low-income families (approximately 71 percent of annual income).⁴

Financial Aid

Financial aid to postsecondary students in the United States increased approximately 12 percent in current dollars (not adjusted for inflation) between 2001-2002 and 2002-2003, growing to more than \$105 billion. Federal and state aid expenditures increased approximately 13.4 and 10.4 percent, respectively, over the same period. Institutional and other grant expenditures increased approximately 11.4 percent between 2001-2002 and 2002-2003.⁵

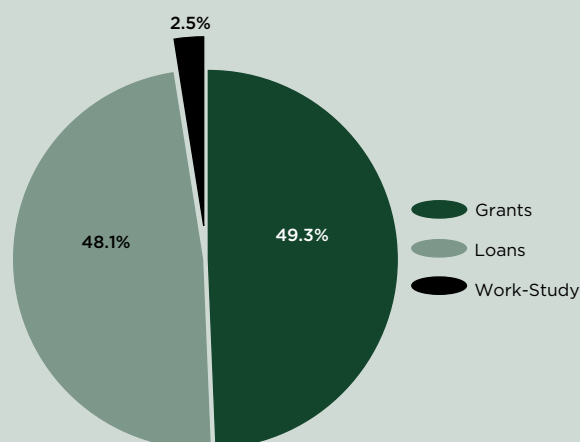

Loans constituted 54 percent of all postsecondary student aid in 2002-2003, while grants comprised 40 percent, and work-study/tax credits accounted for the remaining

2003–2004 student charges and financial aid

6 percent. This represents a significant shift from a decade earlier, when grants comprised 49.3 percent of aid and loans only 48.1 percent.⁶ [Figure 2]

State/Federal Policy

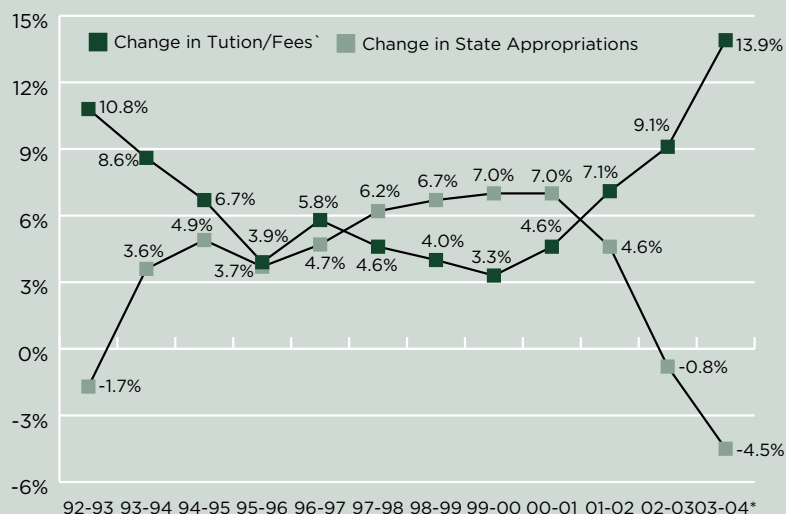

State higher education appropriations declined for the second consecutive year in fiscal year 2004, as many states continued to experience substantial enrollment growth.⁷ To fill growing budget gaps, colleges and universities turned to tuition and fees, underscoring the inverse relationship between state funding and student charges. [Figures 3 and 4]

aascu
— 6 —

Rising tuition has become an issue of growing concern for governors and state legislators, a number of whom are floating proposals to freeze tuition rates, cap tuition increases, or modify tuition-setting authority.

Congress is also debating student charges, with Representative Howard P. “Buck” McKeon (R-CA) introducing the Affordability in Higher Education Act of 2003 as part of HEA reauthorization. The measure would establish an “affordability index” for tuition/fee increases. An institution whose increases exceeded the index would be subject to sanctions limiting its eligibility for federal student aid.

Findings

Tuition and Fees

Average tuition and fees for resident undergraduate students at public four-year colleges and universities increased 13.9 percent, or \$572, from 2002–2003 to 2003–2004 (\$4,116 to \$4,688). [Table 1] Resident undergraduate tuition at American Association of State Colleges and Universities member institutions rose 14 percent, or \$513 (\$3,669 to \$4,182) over this period [Table 2], while resident undergraduate tuition at National Association of State Universities and Land-Grant Colleges member institutions increased 13.6 percent, or \$599 (\$4,391 to \$4,990) over the same period. [Table 3]

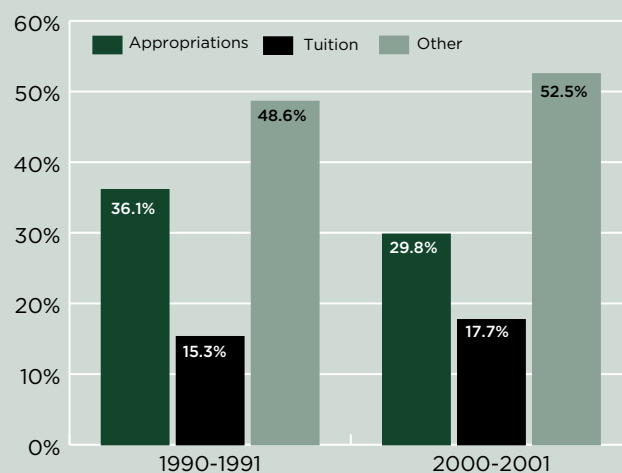

2003–2004 student charges and financial aid

The one-year increase in tuition and fees for non-resident undergraduate students shows a similar pattern. Average tuition and fees for non-resident undergraduates rose by 11.5 percent, or \$1,314 (\$11,391 to \$12,705) at public four-year colleges and universities from 2002–2003 to 2003–2004. [Table 1] At AASCU institutions, the increase totaled 11 percent, or \$1,080 (\$9,853 to \$10,933) over the period [Table 2], while non-resident undergraduate tuition at NASULGC institutions rose by an

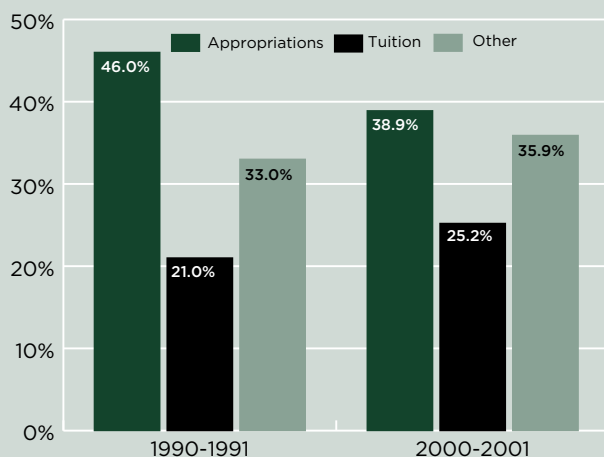

average of 11.8 percent, or \$1,452 (\$12,341 to \$13,793) over the same period. [Table 3]

Graduate tuition and fees also registered significant one-year increases. Resident tuition and fees for master's students at public four-year institutions rose 12.9 percent, or \$649 (\$5,042 to \$5,691) between 2002–2003 and 2003–2004. [Table 1] At AASCU institutions, the increase was 15.6 percent, or \$611 (\$3,909 to \$4,520) over this period. [Table 2] For

Source: National Center for Education Statistics, Integrated Postsecondary Education Data System. "Other" consists of a variety of revenue sources, including: endowment income, federal and state grants and contracts, private gifts, grants and contracts; as well as revenues from hospitals, auxiliary enterprises and the sale and servicing of educational activities and independent operations.

2003–2004 student charges and financial aid

doctoral students, resident tuition and fees grew 12.3 percent, or \$648 (\$5,248 to \$5,896) at public four-year institutions, and 14.6 percent, or \$594 (\$4,076 to \$4,670) at AASCU institutions. [Tables 1 and 2] At NASULGC institutions, the average rate of increase for master's students was 12.1 percent, or \$668 (\$5,515 to \$6,183) and 12.3 percent for doctoral students, or \$694 (\$5,647 to \$6,341) over this period. [Table 3]

Only one state (Mississippi) posted an average 2003–2004 tuition/fee increase at or below the year-over-year increase in the Consumer Price Index (2.3 percent for September 2002–September 2003). Additionally, one state (Wyoming) increased tuition and fees less than five percent. More than half the states (30) saw average tuition and fee

increases above 10 percent for 2003–2004. [Table 4]

More than half of public four-year colleges and universities (58.1 percent) charged less

2003–2004 student charges and financial aid

than \$4,500 in resident undergraduate tuition and fees for 2003-2004. Close to two-thirds of AASCU institutions (64.2 percent) charged less than \$4,500 in resident undergraduate tuition and fees, and just under two-thirds (62.7 percent) of full-time undergraduates at AASCU institutions paid less than \$4,500 in resident undergraduate tuition and fees. [Tables 5 and 6] For NASULGC institutions, more than half (53.4 percent) charged less than \$4,500 in tuition and fees, and just under half of all full-time resident undergraduates at those institutions (48.3 percent) paid less than \$4,500 in resident undergraduate tuition and fees. [Table 7]

Room and Board

At public four-year institutions, average room and board rose 6.0 percent, or \$334 (\$5,564 to \$5,898) in 2003-2004. [Table 1] AASCU institutions posted a one-year increase of 5.4 percent, or \$278 (\$5,126 to \$5,404), while NASULGC institutions posted an increase of 6.8 percent, or \$394 for the same period (\$5,835 to \$6,229). [Tables 2 and 3]

Trends and Indicators

The average tuition and fee increase of 13.9 percent in 2003-2004

stands well above previous years' increases of 9.6 percent for 2002-2003 and 7.1 percent for 2001-2002. The 6.0 percent increase in room and board charges represents a slight percentage increase from the 5.4 percent increase of the previous year. [Figure 1]

From 1993-1994 to 2003-2004, tuition and fees at public four-year colleges and universities increased 47.2 percent or \$1,506 (from \$3,188 to \$4,694) in constant (inflation-adjusted) dollars. Tuition and fees at private four-year institutions rose 42.4 percent, or \$5,835 (from \$13,844 to \$19,710) in constant dollars during the same period.⁸

Room and board charges at public four-year institutions rose 22.2 percent in constant dollars between 1993-94 and 2003-2004, increasing from \$4,480 to \$5,475. Room and

• Average tuition and fees are weighted by full-time undergraduate enrollment.

2003–2004 student charges and financial aid

board charges at private institutions rose 20.9 percent in constant dollars during the same period, from \$5,298 to \$6,403.⁹

The price of college attendance at four-year public institutions as a percentage of family income is edging upward. While this percentage has held relatively steady for middle and high-income families since the early 1980s, there are signs that the percentage is slowly increasing for middle-income families. Student charges as a percentage of family income escalated significantly for low-income families throughout the 1980s and early 1990s. Over the last two years, the cost of attending is approximately 70 percent of family income.¹⁰

Conclusion

Looking forward, fiscal year 2005 will likely be the third consecutive year in which state appropriations for higher education decline as states reduce overall spending to close budget deficits. Though the economy shows signs of recovery, the coming year may be little

Table 5. Distribution of Tuition and Fees for Resident Undergraduates at Public Four-Year Institutions, Academic Year 2003–2004

2003–2004 student charges and financial aid

better than the current year for colleges and universities. A survey released by the National Governors Association and the National Association of State Budget Officers shows that fiscal year 2004 is expected to bring the smallest annual increase in state spending in more than 20 years and that 40 states reduced their fiscal year 2003 budgets after they were enacted.¹¹ The prospect of continued decline in state appropriations for higher education and subsequent tuition and fee increases will fuel increased frustration and backlash against colleges and universities.

The years ahead will be filled with difficult choices for policymakers, higher education leaders, and students and their families. These choices will range from the broad and far-reaching decisions of where students and institutions rank among state and federal funding priorities, to the individual decisions of whether or where to attend college and how to cover the costs.

The emerging policy landscape will require unprecedented creativity and flexibility from leaders at the campus, state and federal levels. It will become increasingly important for policymakers and campus leaders to look beyond short-term fixes and consider long-range policy changes if they hope to expand affordability, accountability and access.

Endnotes

¹The College Board, *2003-2004 Annual Survey of Colleges* (data extracted from Standard Research Compilation files). AASCU and NASULGC data will vary slightly from those presented by the College Board. In presenting its data, the College Board utilizes current year data, as well as a continuously updated data file for the previous year. AASCU and NASULGC utilize current year data, but do not utilize the continuously updated data file for previous years.

Table 7. Distribution of Tuition and Fees for Resident Undergraduates at NASULGC Institutions, Academic Year 2003–2004

Tuition/Fee Level	Number of Institutions	Percentage of Total (Institutions)	Number of Full-Time Resident Undergraduates	Percentage of Total (Students)
Less than \$1,500	2	1.2%	24,402	1.1%
\$1,500 to \$1,999	—	—	—	—
\$2,000 to \$2,499	3	1.8%	51,013	2.3%
\$2,500 to \$2,999	12	7.4%	185,510	8.4%
\$3,000 to \$3,499	19	11.7%	184,472	8.3%
\$3,500 to \$3,999	26	16.0%	348,213	15.7%
\$4,000 to \$4,499	25	15.3%	274,247	12.4%
\$4,500 to \$4,999	10	6.1%	131,776	6.0%
\$5,000 and Over	66	40.5%	1,011,610	45.7%
Total	163	100.0%	2,211,243	100.0%

Source: 2003-04 College Board Annual Survey of Colleges (data extracted from Standard Research Compilation Files)

Notes:

- Results include student charges data for Tuskegee University and the Massachusetts Institute of Technology.
- Data in this table are based on NASULGC institutions that provided tuition and fee and full-time undergraduate enrollment data to the survey in the two-year period.
- Totals may not sum to 100% due to rounding.
